

ank

Il modello Ank si caratterizza per la mancanza della maniglia sostituita dal comodo ed elegante sistema a gola, proposto in quattro eleganti colori e dalla particolare lavorazione a smusso del lato superiore dell'anta in melaminico, per agevolare l'apertura. Con queste caratteristiche Ank si presenta con un' estetica contemporanea, per creare composizioni rivolte a valorizzare lo spazio dedicato alla preparazione razionale dei cibi, ma anche a sottolineare l'unione con lo spazio soggiorno, lasciando libera interpretazione del vivere quotidiano, per creare ambienti polivalenti. L' anta in melaminico dal particolare disegno è ulteriormente caratterizzata dalle raffinate essenze legno e dalle esclusive tinte unite opache.

CREO ECOLOGIC

IL GRUPPO LUBE HA SCELTO DI UTILIZZARE PER I COMPONENTI COSTITUENTI LE STRUTTURE DELLE CUCINE SOLO MATERIALE A BASSISSIMA EMISSIONE DI FORMALDEIDE: CONFORMI ALLO STANDARD F4STELLE SECONDO LA NORMA JIS, CERTIFICATO DAL MINISTERO GIAPPONESE, IL PIU' SEVERO IN MERITO ALLE NORMATIVE DI SALVAGUARDIA AMBIENTALE.

Regarding the production of its kitchen structure components, lube group has decided to only use materials featuring very low formaldehyde emissions complying with the 4-star standard, as defined by the jis regulation. This standard is certified by the japanese government-the most rigorous when it comes to environmental protection.

Ank standards for the lack of a handle, which is replaced by an elegant finger-rail system, offered in four refined colours and with a chamfered top profile of the melamine doors, which facilitates opening.

With these qualities, Ank forms contemporary compositions which add value to your food preparation space and underline its union with the living room, leaving you free to decide how to live in the home and create polyvalent spaces.

The melamine doors, with their special design, also stand out for the refined use of wood and exclusive matt solid colours.
